Research Experience

PhD Candidate in Machine Learning **2025 - present**
Inria Saclay, MIND Team and Université Paris-Saclay *Palaiseau, France*

- Researching time-series foundation models (TSFMs), with controlled studies of tokenization and context length in transformer-based models; large-scale PyTorch pretraining and evaluation on forecasting and classification. Work under review at ICLR 2027.
- Co-developing the open-source benchmark_tsfm suite to evaluate foundation models across forecasting, classification, anomaly detection, and event detection on diverse time-series modalities.

Research Engineer - Pre-doctoral Work **Dec. 2024 - Apr. 2025**
Inria, MIND Team *Palaiseau, France*

- Contributed to BenchOpt and developed a reproducible time-series anomaly detection benchmark covering classical and deep models, real-world datasets, and time-aware evaluation metrics.

Research Intern **Apr. 2024 - Oct. 2024**
Inria, MIND Team and Saint-Gobain Research *Paris region, France*

- Developed and benchmarked unsupervised anomaly-detection methods for multivariate industrial sensor data; delivered reusable production code that became a foundation for anomaly-detection work at Saint-Gobain Research.

Selected Publications & Preprints

RoseCDL: Robust and Scalable Convolutional Dictionary Learning for Rare-event and Anomaly Detection
Jad Yehya, Mansour Benbakoura, Cédric Allain, Benoît Malézieux, Matthieu Kowalski, Thomas Moreau.
AISTATS 2026, Proceedings of Machine Learning Research (PMLR 300).

Investigating the effects of patch size in Time Series Foundation Models
Jad Yehya*, Andrei-Tiberiu Pantea*, Matthieu Kowalski, Aymeric Dieuleveut, Thomas Moreau.
Neurips 2026 workshop TS-LIMITS, Generalization for Time Series in Tight Settings.

RoPE is Dead, Long Live RoPE: Towards Scalable Data-aware Positional Encodings
Jarod Lévy*, Mathurin Videau*, **Jad Yehya**, Jean-Rémi King, Stéphane d'Ascoli, Thomas Moreau.
arXiv:2609.34556, 2026. Work under review.

Education

PhD in Machine Learning 2025 - 2028 (expected)
Université Paris-Saclay - Inria, MIND Team; advisors: Thomas Moreau, Matthieu Kowalski *Palaiseau, France*

Master of Business Administration (MBA) 2025 - 2028
Collège des Ingénieurs *Paris, France*

M.Sc. Computer Science - Data, Learning, Knowledge (DAC), High Honours 2022 - 2024
Sorbonne Université; academic exchange at Università degli Studi di Milano (GPA 3.8) *Paris / Milan*

B.Sc. Computer Science, High Honours 2019 - 2022
Sorbonne Université *Paris, France*

Skills

Open Source: Active contributor to the BenchOpt and its ecosystem, including benchmark_tsad and benchmark_tsfm; merged contributions include TSFM anomaly-detection metrics and efficient evaluation. Contributions to skrub. Recent upstream PRs to vLLM and SGLang are under review.

Tools: Python, PyTorch, NumPy, SciPy, scikit-learn, Hugging Face, BenchOpt, Git, Linux, Slurm, LaTeX, C.

Machine Learning: Transformers, foundation models, representation learning, probabilistic forecasting, anomaly detection, optimization, distributed training.

Languages: French and Arabic (native), English (C2), Italian (B1), German (A2).

Activities and Interests

Music and Sports: Piano (16 years, Conservatoire Guy Dinoird); karate (brown belt; regional champion, 2014).
